

## NORM VI GUIDELINES FOR AUTHORS ON THE PREPARATION OF THEIR POSTERS

1. Poster dimensions are limited to **0.90 m x 1.40 m**. (Actual size of the poster panel: height: 2 m; width: 1 m). As the poster panel will be placed standing on the ground, we advise you to use the above-mentioned usable size of the panel (see figure). To attach your poster on the panel, adhesives are recommended; the Symposium will provide them.

2. Poster material should be prepared with printing large enough to be viewed easily from a distance of 1.5 m. Lettering should be at least 20-30 mm high for the poster title and for headers and at least 10 mm for standard text. Drawings and charts should be simple with bold lines.
3. Each poster must have a top label indicating, a) the title of the paper, b) the names of the authors, and c) their affiliations. It is recommended to include also a photograph of the presenting author, attached on the right side of the poster title (upper right corner) and the name of the representative at the Best Poster Award Ceremony (if different of the presenting author).
4. Text should be restricted to key words and short sentences. Hardcopies of the manuscript (full paper) are not recommended as poster.
5. It is suggested that you bring 50 copies of a handout of your poster material, not to exceed 4 pages. Place this handout at your poster for distribution to the attendees.
6. During the poster viewing and discussion periods, at least one of the authors should be at the poster room.
